## SUBJECT OF MASTER THESIS

---

### Master Thesis

Systems Neuroscience & Neurotechnology Unit  
Saarland University of Applied Sciences  
Faculty of Engineering

Submitted by : Max Mustermann, B.Sc.

Matriculation Number : 1234567

Course of Study : Biomedical Engineering (Master)

Specialisation : Neural Engineering

First Supervisor : Prof. Dr. Dr. Daniel J. Strauss

Second Supervisor : Dr. Farah I. Corona-Strauss

Saarbrücken, June 2, 2015

# Abstract

Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

# Zusammenfassung

# 1 Introduction

## 1.1 Motivation

Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language. <sup>1</sup>

## 1.2 Acknowledgments

Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

## 2 Problem Analysis and Goals

### 2.1 State of the Art

Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

## 5 Discussion

Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

## 6 Conclusions and Future Work

Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

## A Tables and Measurement Results

Table A.1: Surgical needle sizes in Gauge<sup>1</sup>

Size [G]	Diameter [mm]	Colour code
10	3.4	brown-olive
11	3.0	yellow-green
12	2.7	lightgray
13	2.4	purple
14	2.1	lightgreen
15	1.8	blue-gray
16	1.6	white
17	1.4	violet
18	1.2	pink
19	1.1	ivory
20	0.9	yellow

# List of Figures

2.1	10-20-system of EEG leads . . . . .	6
-----	-------------------------------------	---

# List of Tables

A.1 Surgical needle sizes in Gauge . . . . . 12

# List of Abbreviations

**ABR** The Auditory Brainstem Response is a type of time-locked stimulus-dependent evoked potential, which occurs in the acquired EEG signals within tens of milliseconds post stimulus. 6

**EEG** The Electroencephalogram is a weak bioelectric signal originating from the electric sum activity of the apical dendrites of pyramidal neurons in the neocortex. 6
